Subject: Fw: HPHOA5 (Chen-6315 Ocean Avenue North) Notice to Cure

"Your backyard is unkept and must be properly maintained at all times to avoid the risk of rodent and potential water flooding"

This is just another insulted or discriminated statement form HOA again year by year.

This is a very great discrimination statement.

please, stop it and explain it well to me what you meant and what you want? I will keep my rights to lawsuit such nonstop discrimination.

Prove it, please.....

This is the beauty of nature of how different plants grow freely and they live together peacefully, representing a great picture of how New Yorkers and their families always work together to build up a great city for people coming from all over the world for an American dream. These are my pieces of green artwork. Also, my plants and flowers produce a lot of O2 and it just benefits everybody every day. How could you point your finger to tell me that "Your backyard is unkept "? from the last email, I requested you to explain to me but you just ignored me completely. Sad, you did not do your job. Again, what is the meaning of "unkept"? What is the standard of "keep" or "unkept" for a garden yard? or Who was the behind person to say so? Sadly, we know BarBar did it and she has no such qualification to manage the public service because she had no art or public management service education at all. we had never voted her to be the landscaped chairperson, but just because she bought the house earlier than most of us. It is very sad. She has no such education and very discriminated person as every body know. For over 6 years, I have never able to speak with her about any violation that she created for me year by year. What a shameful experience that we all have to deal with her? How or why could not she accept full tired non plant backyard, but not full green garden yard? The answer is that, education.

We need a highly educated person with an art and science and public management college degree to replace her, BarBar, am I right? This will benefit our community greatly.

How does it, "risk of rodent" do with my backyard? Prove it? You meant my backyard created rodent and they could endanger your houses or your home or community? What kind of stupid logic does it show from her or HOA? Stop, please my backyard is my garden, and I plant and manage my flowers and plants. Prove it? please.

This is a very low level insulted and discrimination.

How does it, "water flooding" do with my backyard? again, I cannot believe that someone in "HOA" has no knowledge of our water flooding system but created such a terrible statement, what or how does my yard did to broke
or risk water flooding system?

This is not a joke, but the official statement came from "HOA" and

JeanMarie DaSilva
Office Manager
The Benjamin Companies
377 Oak Street, Suite 110
Garden City, NY 11530

Sincerely!

Then, it became great discrimination, am I right? I took so many pictures every year of our neighborhood as my documents, and I found out they tried to target at my garden yard or other Chinese framilies', many people have many high trees and plants, and they are ok, Qin told me that it was politic in 2020.

In addition, I paid the HOA Maintenance fee every month. What has HOA landscape department done to me? Please view the photos from my house in the attachments. In the same way, I should fine HOA $100 every single month from two years ago. Actually, you all knew the dead plants, but you did not care about the issue. In order to cover the dead plants, I have to plant the new seasonal flower on it. Now you know, HOA violated the contract with Guo Hua Chen, and HOA were fined $2400 officially for this violation.
